

Climate Week North East 2019

Climate Week North East is a week filled full of climate change related events taking place from Friday 15th – Sunday 24th March 2019. There are lots of events for all ages and interests. It is a great opportunity for schools to raise awareness of climate change and help encourage families to take action to reduce carbon emissions and live more sustainably.

To help schools deliver the main messages of climate change we have created an educational pack containing the following –

- Climate change powerpoint presentation to deliver to your pupils. This can be used at an assembly to introduce Climate Week North East.
- Link to Climate Week North East website and programme of events, with highlights of key family events
- List of useful websites and resources
- Carbon Sorting Game from Aberdeen Climate Action
- List of book titles available from Central Library and CRIS
- Resources from One Seed Forward initiative
- Resources from Aberdeen City Council Energy team
- Contact details of organisations offering workshops/presentations to schools

We would love to see what schools are doing during Climate Week North East and also how schools are trying to reduce their carbon footprints during the school year. Schools can submit any examples of work, school events, photographs, images, video clips to the CWNE facebook page via private message - <https://www.facebook.com/climateweeknortheast/>

Aberdeen Climate Action will also be running a school competition focusing on what pupils are doing through the school to reduce carbon emissions. Schools will be asked to upload a short 2 minute video showing what the pupils are doing to their school twitter feed with the hashtag #CWNE2019 by Friday 1st March. More details to follow.

Most importantly we want schools to have fun whilst playing an important part in making changes in everyday school and home activities.

If you have any questions or queries regarding the contents of the school pack or on Climate Week North East please contact Alison Stuart as per details below –
